

Smoke Alarms

5 things to remember

1. Install a smoke alarm in every bedroom, hallway, living area and the top of stairways.
2. Test smoke alarms monthly.
3. Vacuum dust from smoke alarms every six months.
4. Generally, because smoke rises, mounting the smoke alarm in the middle of the ceiling is recommended
5. All alarms have a use by date of 10 years, after this time, the entire unit should be replaced.
