

# Two metres from the heater

## 5 things to remember

1. Don't place clothing or flammable materials too close to heaters - it should be at least two metres from any source of heat.
2. Never leave clothes near the heater if leaving the house or going to bed.
3. Check clothing regularly if drying near a heater.
4. Use a fire screen at all times with open fires.
5. Don't sit too close to heaters.
