

Electrical Safety

Don't overload power points or power boards and never use a damaged plug or power lead.

Switch off appliances when not in use, but leave plugs in place to avoid dust build up in empty sockets.

Don't place extension leads under carpets or furniture.

Don't use electrical equipment if you're wet, standing in water or near water.

Switch off your electric blanket before getting into bed.

Switch off your electric blanket when you are not at home.

Don't place heavy objects on your electric blanket when it is switched on.
